

# CPE Annual Index

Volume 50, 1969

January . . . . .	French chemical processes
February . . . . .	Process metallurgy
March . . . . .	Mixing
April . . . . .	ICAPE exhibition preview
May . . . . .	Urea process survey
June . . . . .	Fans
July . . . . .	Granulation
August . . . . .	Basket centrifuges
	Heat transfer survey
September . . . . .	German chemical engineering
October . . . . .	Drying
November . . . . .	Piping
December . . . . .	Dust control and air cleaning

## Subject Index

\*Denotes a shorter article

HTS denotes Heat Transfer Survey, 1969

### ACETYLENE from methane (Mar.) 75\*

Advances in filtration—*Conference Report* (May) 72

#### Agitated:

crystallisation (June) 86  
vessel scale-up, nomograms for (Sept.) 127

#### Air:

cleaning and dust control (Dec.) 55  
cooler estimation (HTS) 70  
vortex mixing of solids (Mar.) 69

Alfene and Alfol processes—*Process Survey* (Oct.) 103

Alumina from shale (Feb.) 7\*

#### Ammonia:

plants, waste heat recovery in (HTS) 74  
quench converter (Oct.) 7\*

Ammonium nitrate process, French (June) 80

Amortisation rates, comparison with capitalised costs (April) 141

Analysis of mineral separation processes (Feb.) 86

Antwerp—oil port no. 2 (Dec.) 5\*

Applications of the basket centrifuge (Aug.) 55

Automatic dust filter with integral fan (Dec.) 69

### BASKET centrifuge, applications of (Aug.) 55

Batch distillation, review of (Dec.) 83

Bolt sizes, optimum for pressure vessels (Mar.) 77

### CAPITALISED cost, comparison with amortisation rates (April) 141

Carbon-13, isolation of (July) 75

#### Centrifugally-cast:

glass columns (May) 71  
high-alloy tube (Nov.) 67

Centrifuge, dewaxing by (Aug.) 59

#### Centrifuges:

applications of basket (Aug.) 55  
in the chemical industry (May) 67  
uniformity and equivalence conditions in (July) 97; *see also* (Oct.) 106

Chelate compounds of metals, applications of (June) 75

#### Chemical engineering:

and British standards (Mar.) 9\*  
contracting, sales engineering in (Nov.) 121

contracting, trends in (April) 70  
contractors (Sept.) 86, (Dec.) 74

contracts (Jan.) 7\*  
in Montreal—*Conference Report* (Jan.) 92

jobs (Feb.) 7\*

#### Chemical industry:

centrifuges in (May) 67

French (Jan.) 63

safety legislation in (Jan.) 95

Chemical markets, projection of capacity (April) 81

#### Chemical minerals in the USSR:

Part 1 (Aug.) 63

Part 2 (Sept.) 121

Chemical plant, design models for (Nov.) 95

Chemical processes, French (Jan.) 5\*, 53

Clay, sintering of (May) 101

Coal chemicals (Nov.) 7\*

Coking at Immingham (Mar.) 7\*

Compact heat exchangers (HTS) 63

Comparison of amortisation rates and capitalised costs (April) 141  
 Compressor performance evaluation (Mar.) 83  
 Computer detailing of pipework (Nov.) 86  
 Computerised weighing system (Sept.) 103  
 Continuous-operation fluid-mixing equipment (Mar.) 65  
 Cooling towers, mechanical-draught (HTS) 36  
 Corrosion:  
   prevention by impressed currents (April) 127  
   resistance using molybdenum (May) 9\*  
 Cryolite, fluorine recovery for synthetic (Nov.) 117  
 Crystallisation, agitated (June) 86  
 Cyclohexane, cyclohexanol and cyclohexanone—*Process Survey* (June) 63

## **D**ESALINATION processes and costs (Mar.) 71

Design:  
   of multi-layered cylindrical pressure vessels (May) 91  
   models for chemical plant (Nov.) 95  
 Dewaxing by centrifuge (Aug.) 59  
 Dicarboxylic acids synthesis (Dec.) 9\*  
 Diketene (Mar.) 9\*  
 DIN translations (Jan.) 81\*  
 Dished ends (Aug.) 7\*  
 Distillation:  
   batch, review of (Dec.) 83  
   packed column performance (Aug.) 70  
 Drilling in North Sea (Dec.) 72  
 Drops, practical applications of (April) 133  
 Dryers:  
   coolers and calciners, turbo-tray (Oct.) 95  
   industrial, selection sizing and costs of (Oct.) 67  
   rotary louver (Oct.) 77  
 Drying:  
   equipment, trends in (April) 72  
   molecular sieve (Oct.) 97  
   spray, applied to minerals (Oct.) 91  
   spray, applied to thixotropic pastes (Oct.) 87  
 Dust:  
   and grit emission regulations (Dec.) 64  
   control and air cleaning (Dec.) 55  
   explosion (April) 7\*  
   filter, automatic with integral fan (Dec.) 69  
 Dyestuffs, reactive (Nov.) 7\*

**E**LECTRICAL safety in chemical plant (May) 98  
 Equipment selection for vegetable oil refineries (Feb.) 91  
 Ethylene plant (July) 7\*  
 Evaporator/dryers, thin-film (Oct.) 83  
 Explosions in chemical plant (Mar.) 7\*

**F**ANS:  
   for the process industries (June) 61  
   industrial applications of (June) 57  
 Fertilizer marketing (May) 7\*  
 Filters for the chemical and process industries (May) 75

Filtration:  
   advances in—*Conference Report* (May) 72  
   instrument air (Dec.) 67  
 Fluorine recovery for synthetic cryolite (Nov.) 117  
 Forecasting—NEDO reports (Oct.) 5\*  
 Formaldehyde process (April) 7\*  
 French:  
   ammonium nitrate process (June) 80  
   chemical and contracting companies (Jan.) 63  
   chemical processes (Jan.) 5\*; 53  
   nylon (Jan.) 62\*

## **G**ASEOUS suspensions, heat transfer in flowing (Oct.) 108

German:  
   chemical contractors (Sept.) 87  
   chemical engineering (Sept.) 5\*  
   plant exports (Sept.) 63  
   project news (Sept.) 86  
 Glass columns, centrifugally-cast (May) 71  
 Granulation of pharmaceuticals (July) 67  
 Grinding mill, vibration (Sept.) 90  
 Grit and dust emission regulations (Dec.) 64  
 Gypsum conversion process (Oct.) 100\*

## **H**EAT and mass transfer applied to process metallurgy (Feb.) 69

Heaters, vertical for oil refineries (Mar.) 91  
 Heat exchangers:  
   compact (HTS) 63  
   industrial (HTS) 31  
   ptfe (HTS) 60  
   scraped, heat transfer in (Jan.) 85;  
   see also (May) 99  
 Heat transfer:  
   data (HTS) 21  
   in flowing gaseous suspensions (Oct.) 108  
   in scraped heat exchangers (Jan.) 85;  
   see also (May) 99  
   progress in—review of 1968 literature (HTS) 21  
 Heat treatment salts (Feb.) 9\*  
 High-alloy tube, centrifugally-cast (Nov.) 67  
 High-pressure research—*Conference Report* (July) 109  
 Hydraulic fluid, fire-resistant (Aug.) 68\*  
 Hydrocarbon liquids, Prandtl numbers for (Aug.) 77  
 Hydroformylation in gas phase (Oct.) 9\*  
 Hydrogen sulphide removal (June) 7\*  
 Hydrometallurgy, recent developments in (Feb.) 79

## **I**CAPE exhibition 1969:

(April) 5\*; 49  
 preview (April) 53  
 review (July) 80  
 Ilmenite to rutile (July) 9\*  
 Industrial:  
   application of fans (June) 57  
   application of metal chelate compounds (June) 75  
   dryers—selection sizing and costs (Oct.) 67  
   heat exchangers (HTS) 31  
 Instrument air filtration (Dec.) 67  
 Invergordon refinery (Mar.) 5\*, (Sept.) 9\*  
 Iron ore reduction processes (Feb.) 55  
 Isolation of carbon-13 (July) 75

**J**APANESE chemical industry (June) \*5

## **K**INETICS of hydrocarbon reforming (June) 83

## **L**AYING and protection of pipelines (Nov.) 73

Lead insulation (Jan.) 90\*  
 Leather:  
   processing (June) 9\*  
   substitute (Sept.) 7\*

## **M**ANGANESE ore, upgrading (Oct.) 9\* Manufacture of plaster and plasterboard (April) 121

Materials:  
   development (Oct.) 7\*  
   handling (Nov.) 9\*  
 Mechanical-draught cooling towers (HTS) 36  
 Marketing plant (Jan.) 7\*  
 Metal chelate compounds, applications of (June) 75  
 Metallurgical automation (Oct.) 93\*  
 Metallurgy:  
   extractive (Feb.) 5\*  
   high-temperature (Feb.) 7\*  
 Metering of wet steam (July) 103  
 Mineral:  
   processing (Feb.) 63  
   separation processes (Feb.) 86  
 Mixing:  
   air vortex, for solids (Mar.) 69  
   continuous operating for fluid (Mar.) 65  
   equipment—for the chemical and process industries (Mar.) 59  
   of pvc pastes (Dec.) 78  
 Molecular sieve drying (Oct.) 97  
 Molybdenum and corrosion resistance (May) 9\*  
 Multi-purpose refrigeration facility (June) 91

**N**ATURAL gas (Jan.) 9\*  
 NEDO reports, forecasting in (Oct.) 5\*  
 Nickel futures (Dec.) 7\*  
 Nomograms for scale-up of agitated vessels (Sept.) 127  
 Nylon, French (Jan.) 62\*

**O**IL:  
   from tar sands (April) 9\*  
   in the Middle East (Aug.) 7\*  
   refining, progress in (Nov.) 109  
 Optimum bolt sizes for pressure vessels (Mar.) 77  
 Oxygen, measuring dissolved (Nov.) 7\*

## **P**ACKED distillation column performance (Aug.) 70

Particulate material processing (Feb.) 63  
 Pastes, mixing of pvc (Dec.) 78  
 Pharmaceuticals, granulation of (July) 67  
 Phosphorus in Newfoundland (July) 7\*  
 Phthalic anhydride:  
   plants (July) 110; see also (Sept.) 87  
   process developments (Sept.) 74  
   *Process Survey* (Jan.) 69  
 Pipe fabricators and suppliers (Nov.) 77  
 Pipeline:  
   construction, quality control (Nov.) 91

Pipeline (*continued*):  
 development (Nov.) 119\*  
 laying and protection (Nov.) 73  
 Pipework detailing by computer (Nov.) 86  
 Plant marketing (Jan.) 7\*  
 Plaster and plasterboard manufacture (April) 121  
 Polybutene (Nov.) 113\*  
 Polyester history (Mar.) 9\*  
 Polyethylene, new plants (June) 78\*  
 Practical application of drops (April) 133  
 Prandtl numbers for liquid hydrocarbons (Aug.) 77  
 Pressure vessels:  
   multi-layered cylindrical, design of (May) 91  
   optimum bolt size for (Mar.) 77  
   special steels for (Sept.) 99  
 Process metallurgy, heat and mass transfer in (Feb.) 63  
 Process Surveys:  
   Alfene and Alfol processes (Oct.) 103  
   cyclohexane, cyclohexanol and cyclohexanone (June) 63  
   phthalic anhydride (Jan.) 69  
   urea (May) 81  
 Progress:  
   in heat transfer—review of 1968 literature (*HTS*) 21  
   in oil refining (Nov.) 109  
 Projection of capacity in chemical markets (April) 81  
 Propylene in balance (Nov.) 5\*  
 Ptfe:  
   heat exchangers (*HTS*) 60  
   processing (July) 106\*  
 Pulp processing (May) 7\*  
 Pumping, trends in (April) 76  
 Pump, nickel (Nov.) 113\*  
 Pvc:  
   pastes, mixing of (Dec.) 78  
   process (Sept.) 7\*  
 Pyrometallurgy (Feb.) 81

**QUALITY** control:  
 in pipeline construction (Nov.) 91  
 in tube manufacture (Nov.) 85  
  
**RARE-EARTH** plant (June) 81\*  
 Reactive dyestuffs (Nov.) 7\*  
 Recent developments in hydrometallurgy (Feb.) 79  
 Reduction, iron ore (Feb.) 55  
 Refiners, US in the UK (June) 7\*  
 Reforming of hydrocarbons, kinetics of (June) 83  
 Refractories and fibres (Aug.) 7\*  
 Refrigeration, multi-purpose (June) 91  
 Regenerator and recuperator design (*HTS*) 46  
 Review of batch distillation (Dec.) 83  
 Rotary louver dryers (Oct.) 77

**SAFETY**:  
 electrical (May) 98  
 in chemical plant (April) 9\*  
 legislation for the chemical industry (Jan.) 95  
 Sales engineering in chemical engineering contracting (Nov.) 121  
 Saudi Arabia in petrochemicals (Sept.) 9\*  
 Scale-up of agitated vessels (Sept.) 127  
 Scraped heat exchangers, heat transfer in (Jan.) 85; *see also* (May) 99  
 Sintering of clay (May) 101  
 Special steels for pressure vessels (Sept.) 99  
 Spray drying:  
   of minerals (Oct.) 91  
   of thixotropic pastes (Oct.) 87  
 Steels, titanium-clad (Sept.) 95  
 Sulphur, supply and demand (May) 5\*  
 Sygecam (Jan.) 62\*

**THIN-FILM** evaporator/dryers (Oct.) 83  
 Titanium-clad steels (Sept.) 95  
 Total energy systems (Aug.) 9\*  
 Trends in:  
   chemical engineering contracting (April) 70  
   drying equipment (April) 72  
   pumping (April) 76  
 Tube:  
   centrifugally-cast high-alloy (Nov.) 67  
   manufacture, quality control in (Nov.) 85  
 Tubemaking, seamless (Dec.) 9\*  
 Turbine, coal-burning (Sept.) 106\*  
 Turbocompressors in process plant (Sept.) 79  
 Turbo-tray dryers, coolers and calciners (Oct.) 95

**UNIFORMITY** and equivalence conditions in centrifuges (July) 97; *see also* (Oct.) 106  
 Urea—*Process Survey* (May) 81  
 USSR, chemical minerals in—  
   Part 1 (Aug.) 63  
   Part 2 (Sept.) 121

**VEGETABLE** oil refineries, equipment selection for (Feb.) 91  
 Vertical heaters for oil refineries (Mar.) 91  
 Vibration grinding mill (Sept.) 90

**WASTE** heat recovery in ammonia plants (*HTS*) 74  
 Water purification (Mar.) 75\*  
 Weighing system, computerised (Sept.) 103  
 Wet steam, metering of (July) 103
